

QSE-VET Project

PROJECT HIGHLIGHTS

- Launch of the QSE-VET project in Larissa, Greece
- Representatives from Sweden, the UK, Denmark, Italy, hosts from Greece and observers from Ukraine attended
- Project both consider it vital to support VET providers to measure the quality of acquired competences taking into account the requirements of companies and industries.

Launch of the QSE-VET project

"QSE-VET - Quality standards for evidence-based vocational education: indicator 5 and 6 of EQAVET"

This issue is a **"welcome on board"** newsletter! The QSE-VET project was launched in December 2017 and the kick off meeting took place in February 2018 in Larissa (Greece).

QSE-VET kick off meeting in Larissa (Greece)

Project Context

The Organisation for Economic Co-operation and Development (OECD) and European Commission aims at bridging the gap and bringing the worlds of vocational education and training (VET) and labour market closer together to address common challenges.

In Europe, the VET sector still has to go a long way in order to adjust VET to the changing and evolving demands of the labour market and the **'Agenda for new skills and jobs'**. As OECD state in its key report *"Vocational programmes are often rooted in education institutions, tending to develop their own dynamic, and can be too separated from the fast-changing world of modern economies"*.

QSE-VET project main goal

The QSE-VET project will focus on promoting **evidence**-based approaches in VET, firstly on how to align VET programmes offered with the demand in the labour market and, secondly, how to adjust the skills being acquired and the qualifications offered in the curriculum to the occupational skills and qualifications being demanded by employers as the 21st century gets underway.

How does the QSE-VET project achieve it?

- ⇒ Develops guidelines and methods that will increase the effectiveness and efficiency of offered VET programmes.
- ⇒ **Facilitates employers to have an active role in the assessment of students enrolled in VET programmes.**

EBVET is not
a new
approach.

EBVET has
been applied
in Australia
and the USA
for more than
a decade!

*How to
move from
traditional
VET to EB-
VET?*

...QSE-VET!*

QSE-VET Project: Objectives

The overall objective is **to develop guidelines for VET authorities and VET providers concerning indicators for measuring the quality of acquired competences taking into account the requirements of the industry.**

Quality standards will be described through guidelines and operational indicators, supported by concrete best practices. **The standards will facilitate the measurement of VET outcome** and will enable authorities to **introduce accountability for evidence-based vocational education and training (EBVET).**

The QSE-VET project will support:

- ⇒ The European Commission to further elaborate EQAVET towards policy decision with regards to evidence-based VET
- ⇒ VET-related authorities to create accountability policies and recommendations on effectiveness of VET with regards to employability and acquired competences
- ⇒ VET providers to develop better and more effective partnerships with the world of work in order to align their VET programs to the demands for competences by employers
- ⇒ An increased attractiveness of VET, by providing the basis for educational pathways, better and more viable employability.
- ⇒ The Prevention of early school leaving by introducing teaching styles more adapted to 21st Century skills in a learner-centred educational environment.

What is performance-based and evidence-based approaches in VET?

Performance-based approach

This approach is focused both on key competencies and domain-specific ones.

This is an approach to teaching and learning more often used in learning concrete skills than abstract learning.

Learners work on one competency at a time, which is likely a small component of a larger learning goal.

Evidence-based approach

It is not a new approach. In USA, Australia, it started more than a decade ago.

The evidence-based approach for VET focuses on several operational indicators for measuring effectiveness of VET. However, indicators vary from country to country and depend on differences in culture, especially educational culture, awareness of employers and their sense of social responsibility.

QSE-VET Project: Outcomes and

Awareness raising on EBVET

- * National seminars open to interested stakeholders
- * Collection of feedback on EBVET actual implementation

Study on gaps in policy and implementation of EBVET in the European Union

- * Report on study findings
- * Occupational mapping with companies and other employers in relation to transversal skills and the EQAVET dimension

Guidelines and methods on EBVET

- * Guidelines in printed and electronic format
- * Information campaign aiming to inform and train the stakeholders.

Focus on the QSE-VET Guidelines!

The guidelines will address the following issues:

- | | |
|--|---|
| ⇒ Description of EBVET and relevant indicators | ⇒ Implementation and measurement of quality indicators of EB-VET with focus on: |
| ⇒ Existing institutional and policy framework of VET education | ♦ Indicator 5. Placement rate in VET programmes |
| ⇒ Moving towards EBVET with regards to policy actions at European or national level and at providers level | ♦ Indicator 6. Utilisation of acquired skills at the workplace |
| ⇒ Different methods and pathways to implement EBVET | ⇒ Best practices from Europe and internationally. |

Target groups

- | | |
|--|--|
| • VET providers | • National Quality Assurance Reference Point (NRP) |
| • National VET authorities | • EQAVET Expert Group |
| • National associations of VET-providers | • Cedefop |

QSE-VET Partnership

Five (5) partner organisations from 5 different EU countries (Sweden, the UK, Denmark, Greece and Italy) have joined forces through the QSE-VET project consortium in order to research, identify and **bridge the gaps** and **bring the worlds of VET and labour market closer together** to address common challenges.

The structure and the geographical distribution of the consortium seeks to guarantee **the proper implementation of the entire project's stages and outputs** as well as **the more intensive and widespread sustainability of the project's results and products**.

QSE-VET Partnership

1. Folkuniversitetet Uppsala, Sweden
2. RINOVA Ltd, United Kingdom
3. FACO, Denmark
4. DIMITRA , Greece
5. EFFEBI Association, Italy
